Hw 12-Q3	3
Is String class thread safe in Java?	0
We do know that String objects are immutable.	
It is also true that immutable objects are thread so	6
=> String objects are thread safe	
Let's go alittle deeper.	3
Immutable object: an immutable object is an	3
object that would not be able to change its State	0
after coreation.	0
*** The Thing is ***	3
whenever content of the string is changed,	3
a new string is created and the reference is	3
changel.	0
PAPCO Samething will happen in case of multiple thread too	0
maltiple throat too
